### 13. Case Study (Compulsory question)

On 1st January 2018, the Board of Directors of SPK Ltd. wishes to know the amount of working capital that will be required to meet the production activity of the year.

Issued share capital	Rs.	2,00,000
5% Debenture (Secured on assets)	Rs.	50,000
Fixed assets on 1st January	Rs.	1,25,000

Production during the previous year 60,000 units. Same level of activity is expected to be maintained during the current year. The expected ratio of cost to selling price is as follows:

Raw materials	60%
Direct wages	10%
Overheads	20%

Raw materials are expected to remain in stores on an average for two months before issued to production. Each unit of production is expected to be in process for one month. Finished goods will stay in warehouse awaiting despatch to customers approximately three months. Work-in-progress may be assumed to be 100% completion with regard to materials and 50% complete with regards to wages and over heads. Credit given to debtors is three months from the date of depatch. Credit allowed by creditors is two months from the date of delivery of raw materials. Cash at bank is found to be Rs. 21,250 selling price per unit is Rs. 5. Provide for contingency at 12%.
